Invitation to participation in an intercomparison in temperature measurement

Danish Technological Institute hereby invites your calibration laboratory to participate in an interlaboratory comparison concerning the calibration of a thermometer. The intercomparison is mainly aimed at laboratories using equipment such as dry block calibrators for calibration.

A package will be circulated containing the following items: A digital thermometer with two Pt 100 sensors with an outer diameter of 4 mm and 8.33 mm respectively.

The nominal measurement points are: -20 °C, -10 °C, 0 °C, 75 °C, 150 °C and 230 °C. It is possible only to measure a subset of these points.

The participating laboratories are encouraged to use their standard procedures when calibrating the instruments.

The price for participation (exclusive of transport to the next participant in the loop) is EUR 695 exclusive of VAT.

The number of participants in each loop of the intercomparison will be limited to ensure that the participating laboratories will receive the report of the intercomparison at the latest one year after the start of the intercomparison. The starting date is expected to be at the beginning of 2016.

Danish Technological Institute is accredited by The Danish Accreditation and Metrology Fund (DANAK) for providing intercomparisons. This means that the intercomparison will be in full accordance with the requirements of ISO 17043, and the participants' results will appear anonymously in the report.

If you wish to confirm your participation in the intercomparison, or if you have any questions or comments, please contact me **before 15 January 2016**.

On confirmation, please fill in and return the information sheet overleaf by email.

Best regards,

Jan Nielsen, Team Manager
